PROFESSIONAL SUMMARY

IT professional with experience in enterprise infrastructure, networking, endpoint administration, and technical troubleshooting across campus, healthcare, and small-business environments. Builds iPhone and Apple TV applications and self-hosted infrastructure. Holds a B.S. in Information Technology and is pursuing an M.S. in Artificial Intelligence while developing Python and machine learning foundations.

TECHNICAL SKILLS

Systems and endpoints: Active Directory, Microsoft Azure, Entra ID, Intune, Microsoft 365, Windows 10/11, endpoint deployment and troubleshooting

Networking: TCP/IP, DNS, DHCP, Juniper Mist, Ethernet switching, Wi-Fi, switch-port configuration, VoIP, network segmentation and remote access

Development and infrastructure: Swift, SwiftUI, JavaScript, HTML/CSS, API integration, Supabase, Git/GitHub, Linux, Docker, Raspberry Pi, Samba, Tailscale, FFmpeg

PROFESSIONAL EXPERIENCE

Granite Construction Oct 2026 - Present

IT Coordinator II

- Manage service desk requests and troubleshoot PC hardware, software, business applications, and local network issues.
- Support VoIP, Active Directory objects, servers, and services in accordance with corporate IT standards.
- Coordinate equipment acquisition, deployment, and maintenance; maintain inventory, software licensing, and asset lifecycle records.
- Support infrastructure projects, technical documentation, and disaster recovery testing; partner with leadership on technology needs and priorities.

Mather Splendido May 2026 - Oct 2026

IT Support Specialist

- Served as the sole on-site IT technician for a campus of 200+ employees and 400+ residents.
- Administered Active Directory accounts and supported Microsoft Intune- and Azure-managed staff endpoints.
- Configured and troubleshot Juniper Mist access points, Ethernet switches, switch ports, and campus connectivity, including adapting voice ports for data use.
- Deployed and supported Windows computers, printers, peripherals, and VoIP phones; coordinated vendor escalations, IT inventory, and equipment lifecycle activities.

Techboysgvs LLC Mar 2023 - Present

Owner / IT and Network Consultant (Part-time)

- Design, configure, and troubleshoot wired and wireless networks, routers, access points, switches, and firewalls for residential and small-business clients.
- Implement network segmentation and remote access; configure backup, update, and endpoint security practices, and install connected security cameras.

PROFESSIONAL EXPERIENCE CONTINUED

Aspen Dental May 2022 - Apr 2026

Office Manager / IT Coordinator

- Directed daily office operations while providing front-line support for Windows workstations, applications, network-connected equipment, and clinical technology.
- Troubleshot workstation, network, printer, and software issues; coordinated repairs, replacements, installations, and escalations with IT teams and equipment vendors.
- Managed scheduling, patient flow, vendor coordination, and staff operations while maintaining HIPAA-compliant information handling.

Verizon Apr 2018 - May 2022

Sales Manager

- Led team operations, scheduling, customer escalations, and onboarding; trained employees on internal systems, technology products, and troubleshooting procedures.

SELECTED ENGINEERING PROJECTS

Ant Streams | SwiftUI, VLCKit, Supabase, Node.js, Docker, FFmpeg

- Developed native iPhone and Apple TV interfaces for live TV, movie and series browsing, search, saved items, and playback controls.
- Built a browser playback gateway and provider integrations with encrypted credential storage, temporary media relay resources, and bounded catalog loading. Native apps are development builds.

IRON Training | iPhone application and web prototype

- Built a fitness application experience with an iPhone dashboard, exercise library, exercise details, and training program browsing.
- Implemented custom routines, workout logging, and progress views in the HTML/CSS/JavaScript web prototype, with workout data persisted in browser localStorage.

Raspberry Pi homelab | Linux, Docker, Samba, Tailscale, Home Assistant

- Built and administered a Raspberry Pi home server with persistent storage mounts, network file shares, containerized applications, monitoring, and private remote access.
- Explored PoE camera infrastructure, RTSP video workflows, FFmpeg, go2rtc, Home Assistant integrations, systemd services, and remote troubleshooting.

EDUCATION

Grand Canyon University

Master of Science in Artificial Intelligence | Oct 2026 - In progress

Capella University

Bachelor of Science in Information Technology | 2026
Specialization in Information Assurance and Cybersecurity

CURRENT LEARNING

CompTIA Network+ exam preparation. Python programming and machine learning foundations; interests in AI agents, retrieval-augmented generation, and intelligent automation.
